### Products

Flo-Tec offer best of brand products to address all your contamination control and fluid management needs

### Mission

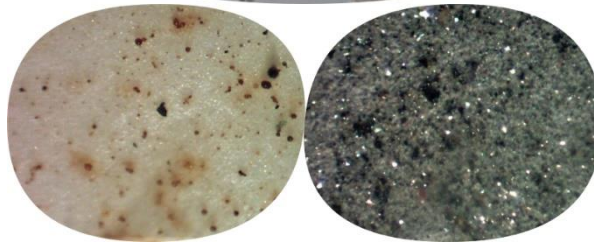

To be the industry leader for the mining and supporting industries through our customer-centric approach to service and product support.

### Values

Integrity  
Flexibility  
Ownership

### Vision

Through our commitment to strive for the lowest cost of ownership for our customers by introducing innovative brands & world-class engineering solutions.

- On-Site Sampling and Results with PALL Patch Test Sample Kit
- On-Site visual interpretations of all Fuel and Oil Samples
- On-Site briefing with maintenance personnel and interactive discussions on sample results
- Immediate results and recommendations on required actions

### What is Contamination Control?

According to MIT, 70% of loss of usefulness of an asset is due to loss of surface material. Of this 70%, 82% is due to mechanical wear caused by particle contamination.

Contamination control is the implementation of industry best practice standards to control the existence, proliferation and growth of contamination in certain areas.

### What do we do?

Flo-Tec offer a range of carefully selected best of brand products and solutions, focused on improving your mobile asset plant Total Cost of Ownership (TCO) by reducing maintenance costs, reducing equipment breakdowns and improving equipment reliability and availability.

### How can we assist?

The aim of all contamination control activities is to permanently ensure a sufficient level of cleanliness in a controlled environment.

Flo-Tec has the technical expertise to assist your business in analysis, identification and rectification of excess levels of contaminants in affected areas in your operations. Flo-Tec also offer services to reduce and limit contamination and assist in implementing an effective fluid management program with cost effective solutions.

#### TECHNICAL SUPPORT

Flo-Tec offers customized technical support services to accommodate the customer needs

#### Reduced Downtime

Flo-Tec products and services are all focussed strategically to reduce asset downtime and increase availability and productivity

## Service Benefits

#### What does this mean for you?

By implementing a cost-effective contamination control and fluid management program, maintenance cost will be reduced considerably, and in doing so increase reliability and availability of your mobile assets in your operations.

## Additional Services

#### Specialized Equipment

Flo-Tec can refurbish specialized equipment for the handling of fuels, lubricants, greases and other fluids associated with the servicing and refuelling of Plant and Machinery. This includes refurbishing of:

Service Trucks

Diesel Bowsers

Water Bowsers

Waste Oil Tankers

Specialized Plant, Containers, Skids or Trailers for the handling of diesel, grease, oils and other fluids

#### Other Products

Pre-Air Filtration Systems

Filter Bag Strainers

Diesel Pumps

Oil Pumps

Flow Meters

Safety Valves

Isolating Valves

Tank Breather Systems

#### What do we offer?

- On-Site fluid contamination analysis
- Comprehensive audit reports
- Immediate remedial actions
- Best practice recommendations
- Fluid contamination control method implementations
- Total Fluid Management standards implementation programs
- On-site service contracts
- Training

#### SERVICES AVAILABLE

Technical Support

Installation and Setup

Preventative Maintenance

Product Support
